PROFILE

Frontend/full-stack developer focused on React and modern JavaScript. I enjoy turning complex interfaces into something simple and intuitive, and I don't stop until every pixel is in place. Always learning something new — from TypeScript to Node.js architecture — and I genuinely enjoy the process of solving problems, not just the result. Looking for a team that values attention to detail, independence, and healthy curiosity.

BIOGRAPHY

Born in 1986. Lives and works in Germany.

EDUCATION

2022 – 2023

TISchool GoIT, Online

Fullstack Developer

2003 – 2008
